

Glitter Crème

Description

If you follow this basic recipe you can convert any of Essential Wholesales Crème Bases into your own Glitter Crème. The lighter crèmes work best, but the butter crèmes will work as well. If you are trying to replicate Essential Wholesales original Glitter Crème use the Jojoba Crème as your base.

Recipe

8 lbs Any Essential Wholesale Crème (128 oz)

.2 lbs Cosmetic Glitter (3.2 oz)

To scent add

.04 to .08 lbs Essential Oil or Fragrance Oil of your choice (.64 oz to 1.28 oz)

Directions

Mix in a stainless steel bowl Essential Wholesale Crème base with Cosmetic Glitter using a stainless steel spoon. For thorough mixture use a clean stick blender instead of a spoon. If you would like to add scent mix in essential oil or fragrance oil with gentle stirring or short bursts of mixing with stick blender. Finished product should be packaged into bottles or jars. Jars are the best option for crèmes. There are several options for packaging your jars. You can spoon finished product into jars, use a funnel or use a clean zip lock bag to package. If you chose to use a zip lock back simply fill bag with finished crème and snip one corner of the bag to release product. The size of the snip will determine how quickly or slowly the product releases from the bag.

Approximate Yield

15 bottles or jars (8 oz), 20 bottles or jars (6 oz), 30 bottles or jars (4 oz), 60 bottles or jars (2 oz) or 120 (1 oz) bottles or jars.

Equipment

Stainless steel bowl

Stainless steel spoon

Gloves (recommended)

Funnel or zip lock bag

Bottles or jars

Alcohol to cleanse all equipment before use

Ingredient List

Add Acrylates Polymer (Cosmetic Glitter) to the ingredient list prior to Tocopherol
