

Glitter Jelly

Description

If you follow this basic recipe you can convert any of Essential Wholesales Jelly Bases into your own Glitter Jelly. This is a great oil free light way to glitter the body. You can also add glitter to the Styling Hair Jelly using this same formula to add some pizzazz to hair styling.

Recipe

8 lbs Any Essential Wholesale Aloe Jelly
.2 lbs Cosmetic Glitter

To scent add

.04 to .08 lbs Essential Oil or Fragrance Oil of your choice (.64 oz to 1.28 oz)

Approximate Yield

15 bottles or jars (8 oz), 20 bottles or jars (6 oz), 30 bottles or jars (4 oz), 60 bottles or jars (2 oz) or 120 (1 oz) bottles or jars.

Equipment

Stainless steel bowl
Stainless steel spoon
Gloves (recommended)
Funnel
Bottles or jars
Alcohol to cleanse all equipment before use

Directions

Mix in a stainless steel bowl Essential Wholesale Aloe Jelly base with Cosmetic Glitter using a stainless steel spoon. For thorough mixture use a clean stick blender instead of a spoon. If you would like to add scent mix in essential oil or fragrance oil with gentle stirring or short bursts of mixing with stick blender. Finished product should be packaged into bottles or jars. Jars are going to be the simplest to fill with this product. There are several options for packaging your jars. You can spoon finished product into jars, use a funnel or use a clean zip lock bag to package. If you chose to use a zip lock back simply fill bag with finished jelly and snip one corner of the bag to release product. The size of the snip will determine how quickly or slowly the product releases from the bag. If you are packaging into bottles it is simplest to use a funnel.

Ingredient List

Add Acrylates Polymer (Cosmetic Glitter) to the ingredient list prior to Phenoxyethanol.
